

CANCER PREVENTION & RESEARCH INSTITUTE OF TEXAS

Award ID:
10-05

Project Title:
Texas Cancer Information

Award Mechanism:
Legacy Grant

Principal Investigator:
Foxhall, Lewis

Entity:
The University of Texas M.D. Anderson Cancer Center

Lay Summary:

Texas Cancer Information or TCI (www.texascancer.info) offers on-line and printed information for patients, caregivers, the general public, health care policy planners, researchers, physicians, and other health professionals. TCI maintains and updates databases of statewide health care providers, facilities, cancer programs, community resources and support information which are updated annually through a formal survey process. Other online services include: population and cancer statistics by county and for the entire state, as well as an online resource titled Access to Cancer Care for Low-Income and Uninsured Patients available for each of Texas' 254 counties. In collaboration with the Physician Oncology Education Program and the Texas Medical Association, TCI also produces educational posters for physicians and the public. TCI maintains and updates CPRIT's historical database of projects as well as the following websites: Texans Conquer Cancer (www.texansconquercancer.org), Texas Cancer Control Toolkit (www.texascancertoolkit.org), and texascancersurvivor.info (a project of the Texas Comprehensive Cancer Control Coalition).
